Application/Control Number: 09/679,854

Art Unit: 2615

DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance:

Applicant's amendment filed on 11/08/04 has been fully considered and they are persuasive.

Referring to new claims 1, 13, 14, 44 and 46, the applicant argues that Duncan reference (U.S. Patent 6,597,394) fail to disclose, teach or suggest that latches 640-643 are used "alternately" for fetching input image data and /or latches 646-647 are used "alternately" for storing output image data. The examiner agrees.

The prior art does not teach or fairly suggest an image transform processor for processing image data, comprising: a programmable arithmetic processor capable of receipt of the image data from a data source over a data path and processing the digital image data, the programmable arithmetic processor comprising a first set of local buffers and a second set of local buffers, each buffer in the first set of local buffers alternately used for fetching input image data and each buffer in the second set of local buffers alternately used for storing output image data; and a programmable input addresser that controls transfer of the image data from the data source to the programmable arithmetic processor by providing a source address onto a source address path, the source address identifying the data source.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.

Art Unit: 2615

Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lin Ye whose telephone number is (703) 305-3250. The examiner can normally be reached on Mon-Fri 8:00AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew B Christensen can be reached on (703) 308-9644. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
